

A DECISION MADE EASIER:

BEAUTIFUL BUILDINGS THAT LAST

Prestigious Solutions that Inspire the Imagination Today

Business owners and manufacturers are faced with tough decisions every day. A common thread to many challenges often concerns the bottom line. Whether it's about technology development, equipment upgrades or even building infrastructure, the key question is:

How will this solution protect my investment?

NS BlueScope Malaysia Sdn Bhd, a leading international manufacturer of coated and pre-painted steel products, has been instrumental in shaping the building and construction industry for over 25 years.

NS BlueScope is a name synonymous for long-lasting, SIRIM-certified coated steel products and it is the only local manufacturer of COLORBOND® pre-painted steel.

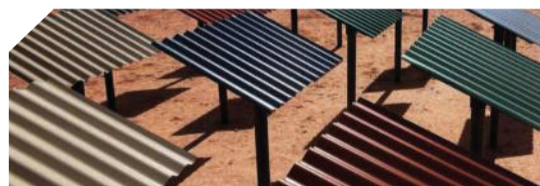

The Trusted Solution

COLORBOND®, the leading name in steel roofing and walling in the building and construction industry, is seen as the undisputed solution as it provides security and protection that lasts, even in the harshest environments.

Over the last 5 decades, COLORBOND® steel has earned a solid reputation for quality, versatility, and durability. Its formability enables profiles with exacting requirements often required by sophisticated designs with sleek curves. It is an investment that stands the test of time.

Tough-Tested

COLORBOND® has evolved through technological advances and a consistent focus on quality. It has also been evaluated in accelerated lab tests for corrosion resistance, durability and application, and field-tested in Australia, standing up against some of the harshest weather conditions in the world.

Today, COLORBOND® is one of the toughest and most advanced building materials, and with a wide range of products and colours, a preferred choice for roofing and wall solutions.

Distinctively Beautiful

BlueScope's proprietary technology gives COLORBOND® steel unique advantages. A superior paint system adds unsurpassed protection to aesthetic appeal, which means it stays beautiful for a longer period of time. It makes the surfaces resistant to dirt staining, maintaining a clean look.

Thermal Comfort

The economies of thermal control are also an advantage to consider.

COLORBOND® Thermatech Solar Reflectance technology is designed to reflect the sun's heat and

reduce surface temperature, enabling thermal efficiency with a specified insulation solution.

A Malaysian Industry First: Eco-Label Certified

NS BlueScope Malaysia, maker of COLORBOND®, is the first coated steel manufacturer to be given the SIRIM Eco Label Certification for Coated Flat Steel Products, meeting the criteria set by SIRIM QAS International, a member of the Global Ecolabelling Network (GEM). The SIRIM Eco-Label Certification identifies a product's overall environment impact and confirms the communication of its environmental information to consumers and businesses.

A Complete Range of Inspiring Choices

In addition to a 38-colour palette that appeals to both classic and contemporary tastes, the COLORBOND® range offers specific advantages in durability, versatility and energy efficiency:

- COLORBOND® Thermatech. Designed to optimize thermal performance for more energy-efficient buildings. Heat reflection from roofing helps to control interior comfort.
- COLORBOND® Spectrum. A choice that appeals to an aesthetic and design sensibility.
- COLORBOND® XPD. For long-lasting beauty with exceptional paint performance and premium colour retention.
- COLORBOND® Ultra. Tough and versatile. It is an excellent solution for protection against severe environment conditions.
- COLORBOND® Ultra Matt. Another stylish choice that reduces unwanted glare.

Enhancing Communities Throughout Malaysia

COLORBOND® steel technology produces a premium product that continues to play a pivotal role in the evolution of architecture. Its versatility and design appeal can be seen in a wide variety of working and living structures that enhance our landscapes. To name just a few:

Residential

- Eco Ardence
- Rivervale
- Others

Commercial

- Impression Theatre
- Design Village Mall
- Others

Industrial

- Maple Tree
- Pos Malaysia
- Others

Infrastructure

- MRT2 Show unit
- Air Traffic Control Centre
- Others

Made from Australia Technology tested in the harshest tropical weather, COLORBOND® Steel stands through it all, protecting you through time, on any architecture.

Peace of Mind

For discerning business owners and manufacturers looking to upgrade their building infrastructures, COLORBOND® is the smart, go-to choice for any project. As a premium roofing and walling solution, COLORBOND® delivers proven quality and durability, with the benefits of being environmentally friendly and visually appealing.

A building investment is a significant decision, but the advantages of COLORBOND® makes the choice of materials a matter of simple logic. Beautiful buildings that last begin with one wise decision: The best choice is COLORBOND®.
